

ABDESAMAD QOUQI

IT, AI & DATA ENGINEERING STUDENT

As an engineering student at EFREI Paris, I am seeking a **5-month internship** (from **November 3, 2025**, to **April 3, 2026**) in **AI** applied to **Project Management** and **Data**, in order to put into practice my technical and strategic skills at the intersection of **IT** and **Data Science**.

Paris (France)

[Abdesamad QOUQI](#)

abdesamad.qouqi.pro@gmail.com

EDUCATION

- 2024 - 2027
Engineering Degree in CS EFREI (4th year)
- 2021 - 2024
Bachelor's Degree in Health Sciences UPEC
- 2018 - 2021
General Scientific Baccalaureate Racine (Paris)

HARD SKILLS

- Project Management
- Programming
- Data Processing
- NLP

SOFT SKILLS

- Creativity
- Quick Learning
- Rigor
- Team Spirit

LANGUAGES

- **French** : Native
- **English** : Fluent (TOEIC C1)
- **Spanish** : Intermediate

SOFTWARE

EXPERIENCES

- SOLUTION DELIVERY PROJECT "URBIN"**
EFREI PARIS / JUNE 2025 - JULY 2025 (2 MONTHS)
 - Wild Waste Reporting Website with image upload, geolocation, and interactive map
 - Dynamic map and real-time statistics (SQLite, Pillow, OpenCV, Chart.js, Django)
 - Visual detection based on features extracted via Python algorithm (Flask)
 - Technical presentation + client meeting for final validation
- INTERNATIONAL MOBILITY SEMESTER (EFREI)**
STAFFORDSHIRE UNIVERSITY (UK) / JAN. 2025 - MAY 2025 (4 MONTHS)
 - International Experience: Strengthened language skills through immersion
 - AI & Machine Learning: Theoretical deepening and hands-on applications
 - Web Project (SCRUM): Designed and developed an e-commerce perfume website
 - Web/ML Project: Built an AI-powered ChatBot
- PERSONAL PROJECT**
SELF-TAUGHT / SEP. 2024 - APR. 2025 (8 MONTHS)
 - Studied key AI concepts (neural networks, NLP, supervised learning, etc.)
 - Online courses (Coursera, YouTube, Medium articles): AI fundamentals
 - Personal projects (Python): image classification (CNN), AI chatbot ("transformer"), etc.
 - Experimentation: frameworks like TensorFlow and scikit-learn
- GROUP PROJECTS**
EFREI PARIS / SEP. 2025 - JAN. 2025 (5 MONTHS)
 - Company culture, Communication, Programming, Operations Research, etc.
 - Example: Designed a waste management app with Figma (Ecospot!)
 - Example: Built an SQL database for a car rental agency
- BIOINFORMATICS INTERNSHIP (UPEC)**
IMRB MONDOR / DEC. 2023 - JAN. 2024 (2 MONTHS)
 - Study of bacterial networks using R and RStudio
 - Wrote weekly analysis reports
 - Created a scientific poster + gave an oral presentation for internship validation

Subject: Application for an Internship in AI Applied to Data and Project Management (November 2025 – April 2026)

Dear Madam or Sir,

Currently enrolled in the fourth year of an engineering program at EFREI Paris, I am aiming to specialize in the fields of IT (Information Technology), Data Science, and AI (Artificial Intelligence), with a particular interest in their practical applications in Project Management, Digital Marketing, and Data Processing. In this context, I am seeking a five-month internship, from November 3, 2025, to April 3, 2026, in order to apply my skills at the intersection of these domains.

My academic background, which bridges health sciences (Bachelor's degree from the University of Paris-Est Créteil) and computer engineering, has given me a multidisciplinary outlook with a strong focus on innovation. Passionate about Machine Learning and digital strategies, I have, for instance, developed an intelligent chatbot for an online perfume store as well as a banking fraud detection system, both within academic projects.

My international semester at Staffordshire University (United Kingdom) also allowed me to further develop my skills in NLP, recommendation systems, Agile management of web projects, and more.

Today, I am eager to contribute to a rewarding project within a dynamic organization, where I can offer both technical rigor and creativity. My objective: to actively take part in concrete initiatives involving AI in the service of digital performance.

I would be pleased to further discuss my application with you and remain at your disposal for an interview. Yours sincerely,

Abdesamad QOUQI
